

PE/PP/PS Pelletizing Machine From http://

Introduction of The Product:

The unit consists of extruder, cooling water tank, drying machine, granules cutting machine and shaking sieve, and the total length is about 12 meters. It is suitable for making granules from PET, PP, PS, PVC, PE and other engineering plastic. Multi-used, High production capacity, advanced technology.

The Main Technical Parameter:

Granule length 3mm
Max cutting piece 20
Blade size(DxL) 200x200mm
Max Output 300-500kg/h
Power 5.5kw
Size(LxWxH) 1200x1500x1800

Weight 1200kg
