

PP Packing Belt, Drawbench Production Line From http://

Accurate dosing and raw material blending

Preheat and dry circulating automatically

Even plastication, stable extrusion and exact temperature control

Measuring pump ensure consecutive and stable production

Big hauling force stretching device and insulation oven

Big capacity stainless steel water trough, automatic liquid level control.

Thermal forming and haul off device

PET Package strap production line

Twin screw extruder with specific design:

1. 100% recycle material
2. strong vacuum system to dispense with dehumidify and dry.
3. the recycle material consumption is lower 40% than raw material.

The main technique parameter

Band width:	9-32mm
Production linear speed:	120m/min
Stretch ratio:	4-9
Max.output	60-200kg/h
