

## Single Screw Pelletizing Machine From <http://>

### Single Screw Pelletizing Machine

The machine consists of extruder assorting with relative granulating auxiliary machine. It is mainly used in the processing of PVC granules and grains produced and uniform, dense and beautiful to look at.

The machine has same features. It can fine plasticizing, high productive efficiency, impact construction in the whole machine and high automatization.

#### The Main Technical Specifications

Model	Unit	SJ-ZL65	SJ-ZL75	SJ-ZL90
Screw Dia.	mm	φ65	φ75	φ90
Screw Ration	L/D	18:1	18:1	18:1
Motor Power	KW	7.5	11	15
Speed Range	r/min	20-90	20-90	20-80
Heating Power	KW	9	11	13.5
Granularity	mm	φ3×3.2	φ3×3.2	φ3×3.2
Feeding Mode		By Wind	By Wind	By Wind
Machine Dimensions (L×W×H)(Approx)	m	7×2×1.75	8×2×1.75	9×2×1.85
Machine Weight (Approx)	T	3.0	3.3	3.8
