
ASTM A 252 Large diameter SSAW Steel Pipe From <http://www.spiralsteelpipe.com/>

ASTM A 252 Large diameter SSAW Steel Pipe

Technical Delivery Conditions

the technical delivery conditions for the circular, square and rectangle hollow section bars, which don't need heat treatment after cold forming, are defined.

Specification

Outside diameter: 219.1mm-3048mm

Wall thickness:5.0mm-30.0mm

Features

The raw materials of the same width can be processed in different molding angles to manufacture steel pipes in various diameters. The spiral steel pipe shaping method ensures that the pipe will be round and straight in shape without any straightening procedure.

Materials

We use A25-X100 steel type to manufacture [ASTM A252 steel pipe](#).

Zhongshun is an [ASTM A252 SSAW](#) steel pipe manufacture and supplier. We also offer [ERW steel pipe](#), [black steel pipe](#) and [coating](#) steel pipe, etc. Our high quality products are offered at competitive prices. Zhongshun is located in China, where the full chain of manufacturing pillings and galvanized steel pipes can be completed, even in one city, which helps save our production cost. Our lower manufacturing cost saves your purchasing cost.
